

11th INTERNATIONAL CONFERENCE ON MARINE BIOINVASIONS

Baltimore, Maryland, United States

May 15 – 19, 2023

JOIN US!

The International Conference on Marine Bioinvasions (ICMB) is an international forum where scientists and policy makers from around the world meet to review current challenges in the global management of invasive marine organisms and to facilitate the exchange of ideas and research results among scientists and policy makers from around the world about marine invasive species. Themes include:

-  Biofouling dynamics: ships, plastics, and management strategies
-  Climate-driven invasion effects and responses
-  Socio-ecology and multiple perspectives on invasions
-  Invasion impacts: ecological interactions, ecosystem services, and economics
-  Methods for non-native species detection and assessment
-  Principles, patterns, and contrasts of invasions across ecosystems

Please visit
